AI Lab: Future of Jordan

A portfolio-ready artifact created from an AI Lab image-generation exercise. This brief documents the final image, the prompt, the workflow, and the academic framing required for the course portfolio.

Title

AI Lab: Future of Jordan

Objective

Create a future-oriented image of Jordan that preserves recognizable cultural and geographic references, including Petra, Arabic calligraphy, and people represented in traditional dress.

Tools and Technologies Used

ChatGPT image generation, image prompt engineering, GitHub Pages, HTML/CSS, PDF packaging, and APA 7 citation formatting.

Value Proposition

Demonstrates applied AI literacy by showing how prompt design, visual communication, and documentation can transform a lab activity into a finished portfolio artifact.

Figure 1. AI-generated concept image of Jordan in the future featuring Petra, Arabic calligraphy, futuristic architecture, and people in traditional clothing.

Artifact Information

Introduction

This artifact demonstrates how prompt design can direct a generative AI system toward a culturally grounded visual result instead of a generic futuristic scene.

Description

The artifact includes the completed image, the original prompt, and a concise write-up that explains how the visual was planned, generated, and documented for a professional portfolio audience.

Process

1) Defined the visual goal as a future-oriented image of Jordan with clear cultural anchors. 2) Specified Petra, Jordanian people, and Arabic calligraphy in the prompt to anchor the output culturally. 3) Generated the image in ChatGPT using a detailed natural-language prompt and reviewed the result for alignment with the intended setting and symbols. 4) Packaged the result into a portfolio artifact with the final image, a downloadable brief, and assignment-aligned documentation.

Unique Value

Combines generative image ideation with cultural specificity, which makes the result more intentional and more useful than a generic future-city prompt.

Relevance

Relevant to instructors, employers, and collaborators who want evidence of applied AI literacy, prompt design, and the ability to explain process clearly.

Prompt Used

"Generate an image that showcases Jordan, the country in the future. Make sure you include the traditional aspects that make Jordan unique, such as Petra (one of the 7 wonders of the world), make sure you include people in the image to show the viewer what Jordanians look like. Having Arabic calligraphy somewhere would be nice as well."
